PERSONAL PROJECTS

Crwn-Clothing E-Commerce Website
- The Crwn-Clothing E-Commerce Website is a React-based e-commerce platform with Firebase integration. It enables user registration and login via Google or email and provides a convenient online shopping experience. Users can explore a diverse product catalog, add items to their cart, and seamlessly proceed to checkout.

Smart-Brain Facial Recognition App
- The Smart-Brain Facial Recognition App is a full-stack web application that combines cutting-edge technologies to provide an innovative and user-friendly experience. Leveraging React for the front end, Node.js for the server, and PostgreSQL for the database, this app offers seamless user registration and authentication.

NASA-PROJECT
- The NASA-PROJECT is a web application built with Node.js and MongoDB, designed to provide users with valuable insights into upcoming NASA launch missions and the history of past launches. Users can actively contribute to the platform by adding launch details, fostering a collaborative and informative space exploration community.
